

ATTRACTIVE GOODS!

COUPLED WITH **Attractive Prices!**

Is a combination usually irresistible. When we took stock January 1, we pushed profits aside and surrendered our store to the profit of our patrons. At every counter you stand before special values at special prices—that are passing privileges—quickly passing too. If you've delayed getting a Suit, or an Overcoat, until the prices went down, don't wait any longer; they are lower now than they have been for the last thirty years. We are able to make a bargain with you now, greatly to your own advantage.

SUPERB FRENCH MODEL.

The ideal for slender figures—splendid support for fuller figures. Boning never works through the binding—never breaks—never rolls up. No brass eyelets to stain garments and cut lacers.

Sold by ALL RETAILERS,

who will refund the money if not satisfactory after three weeks wear.

LAUGHLIN TIN PLANT.

The Contracts Are Let and the Project Is Now a Sure Go.

A LARGE NUMBER OF WORKINGMEN

Will Be Given Employment at the New Plant, Which Is to Be Completed Early This Year—Description of the Plant, Which Will Be One of the Best in the United States—Notes from Local Workshops.

The tin plate mill in connection with the Laughlin, mill works at Martin's Ferry is no longer a doubt but is a sure go. All of the contracts have been let, the details nearly all arranged and ground will be broken for the plant as soon as the weather will permit. The Intelligencer's information is official and Martin's Ferry is to be congratulated on the acquisition of this new and important industry. It will be the first tin plate works in the town proper and will give employment to a large number of persons; just how many is not now known. The contract calls for four complete mills. Work has been commenced on the machinery, which will be the very best and to be ready as quickly as possible.

The plant will be completed as early in the year as workmen are able to do it and the manufacture of tin plate commenced immediately, providing everything is satisfactory at that time. It is understood that the Laughlin people had flattering offers to locate at several other places. One town, according to the report, offering a bonus of \$75,000, but the company decided to build in Martin's Ferry, for several reasons. Some Martin's Ferry people feared that the company would accept one of the outside offers and the town should be glad that it is to have the new industry. It means a better day for Martin's Ferry. Totten & Hogg, of Pittsburgh, have the contract for the tin plate plant and their reputation is a guarantee of the character of the work that will be done.

When completed the plant will be one of the finest and best tin plate mills in the United States. The machinery will consist of twenty-four inch hot mills and four twenty inch cold mills, and four twenty inch cold mills, and room has been provided for four more hot mills. The mill buildings will be of iron and the tinning house and packing room of brick. The hot mill building will be 70x140 feet, with shed to cover heating and pair furnaces 20x140 feet, and shed to cover annealing furnaces 25x145. The cold rolling building will be 62x124 feet, with shed for annealing furnaces 25x90 feet.

The plant was designed by F. D. Freeman, of the Totten & Hogg company, who with his son will take charge of the erection and starting of the plant. The nail plate train of rolls in the Laughlin mill will be changed into a train for rolling the sheet bars for the new plant. Shears and roller tables to be put in will enable them to cut the sheet bar to proper lengths as fast as it is rolled.

The Laughlin people had an option on the old foundry property near the mill, but will not take it. Other property nearby has been acquired. The mill has its own coal bank, and this is valuable property since natural gas has become so expensive.

Industrial Notes.

Spence, Baggs & Co. are working three days a week.

The tin plate scale has not yet been signed at the Etina-Standard mills.

Orders are plentiful at the West Virginia glass works, which is on full.

The Union glass works is doing a nice business. More decorators have been employed.

Hipkins Novelty mould works of the Etina-Standard mill was off this week, owing to the shortage of gas.

Will Start Soon.

Work will soon be started on the new Pan-Handle passenger station in this city, although the company's offices will not be removed from the present

structure for about a month. The contractors, Hallock Brothers, are now in Pittsburgh conferring with the Pan-Handle's chief engineer, Mr. Becker, relative to minor points in the construction of the station building.

SULLIVAN ARRESTED.

An Arrest Made in Homestead of Interest in Martin's Ferry.

Patsy Sullivan, one of the men wanted for assaulting and robbing John Ward, the oil man, and burglarizing Joseph Williams' grocery, both in Martin's Ferry, was arrested yesterday at Homestead, Pa., at the request of the Martin's Ferry authorities. They have been after Sullivan since Ward was robbed, some two months ago. They have been writing and telegraphing to different towns and located Sullivan in Pittsburgh soon after the Williams robbery. From that city he was traced to Homestead and locked up yesterday afternoon. If he refuses to come without a requisition steps will be taken at once to secure the necessary papers. The assault and robbery of Ward was chronicled at the time. Ward gave his name as Smith and said over \$200 was taken.

The Martin's Ferry officers say they will have no trouble in convicting Sullivan on both charges. It is said that at least one other charge will be preferred against him and that he is also wanted elsewhere.

Memorial Services.

Welcome Lodge No. 6, A. O. U. W., has made very elaborate arrangements for the seventh annual memorial service, which will be held in A. O. U. W. Temple on Sunday afternoon at 2 o'clock. They extend a cordial invitation to all members of the order, their families and friends to be present. The following programme has been prepared for the occasion:

Solo.....Bro. Chas. Zulauf
Address, Grand Master Workman W. O. McCloskey
Music.....St. Joseph's Cathedral Choir
Closing Ode.....By All Present
Prof. Herman Schockey, Accompanist.

Common Sense

Should be used in attempting to cure that very disagreeable disease, catarrh. As catarrh originates in impurities in the blood, local applications can do no permanent good. The common sense method of treatment is to purify the blood, and for this purpose there is no preparation superior to Hood's Sarsaparilla.

Hood's Pills cure constipation by restoring peristaltic action to the alimentary canal.
